**DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-54 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claims 1, 19, and 37, the limitation "transmitting in a non-directional manner" renders the claims indefinite. Is the antenna transmitting a signal in omnidirectional, directional, spatial, sectoral directional, or azimuthal directional? Also, the phrase "manner" renders the claim indefinite because it is unclear whether the limitation(s) following the phrase are part of the claimed invention. See MPEP § 2173.05(d). The limitation "the repeated transmitting is non-identical repetition". Is it the repeated first downlink message. Furthermore, is the transmitting signal non-identical due to timing, data content, or transmission power. Appropriate corrections are required.

**Conclusion**

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Kuwahara et al. (6,141,335), Acampora (5,697,066), and Kuisma (5,276,920) disclose antenna system for a radiotelephone communication system.
